

IHC CDF Dredge Project : Air Monitoring Action Taken Log

Week Ending Date :

October 27, 2012

<i>Item #</i>	<i>Item Date</i>	<i>Description of the Event or Issue</i>	<i>Description of Action Taken</i>
1	October 21, 2012	Air Monitor M1 and M4 have been sensing unusually particulate readings intermittently for several weeks.	The Cerex unit stopped receiving data from the Thermo practical meter. Cerex installed a new program which is not sending data to the base station. The new program is being modified.
2	October 22, 2012	USGS weather station is reporting "0" wind speed and "0" wind direction causing the system to default to no CDF contribution.	Informed USGS via email of the problems identified with the weather station after discovery of the issue.
